1 Overview

1.1 Background

The Capital Requirements Directive (CRD), initially introduced on 1 January 2007, aims to promote safety and soundness in the financial system. It is structured around three Pillars of regulation:

- Pillar 1 defines minimum capital requirements;
- Pillar 2 sets out the supervisory review process; and
- Pillar 3 on market discipline specifies disclosure requirements, which allow market participants to assess key pieces of information on the firm's capital, risk exposures and risk assessment process.

This document sets out the Pillar 3 disclosures of OneSavings Group ('the Group'), which includes OneSavings Bank plc. ('the Bank' or 'OSB') together with its subsidiaries, in accordance with the requirements of BIPRU 11. The disclosures are based on data as at 31 December 2012.

2 Pillar 3 Disclosure Policy

The Group is supportive of the overarching objective of Pillar 3 disclosures, which is to promote market discipline through disclosure, as a complement to supervisory efforts, to encourage banks to assess risk, maintain capital and develop and maintain sound risk management systems and practices.

The Group will publish Pillar 3 disclosures setting out its risk management objectives and policies covering:

1. the strategies and processes to manage those risks;
2. the structure and organisation of the relevant risk management function or other appropriate arrangements;
3. the scope and nature of risk reporting and measurement systems; and
4. the policies for hedging and mitigating risk, and the strategies and processes for monitoring the continuing effectiveness of hedges and mitigants.

2.1 Materiality

The Group regards information as material in disclosures if its omission or misstatement could change or influence the assessment or decision of a user relying on that information for the purpose of making economic decisions. If the Group deems a certain disclosure to be immaterial, it may be omitted from the Pillar 3 disclosure.

2.2 Confidentiality

The Group regards information as proprietary if sharing that information with the public would undermine its competitive position. Proprietary information may include information on products or systems which, if shared with competitors, would render the Group's investments therein less valuable. Further, the Group must regard information as confidential if there are obligations to customers or other counterparty relationships binding the Group to confidentiality. In the event that any such information is omitted, we shall disclose such and explain the grounds why it has not been disclosed.

2.3 Verification

The information contained in the Pillar 3 disclosure document has not been audited by the Group's external auditors, does not constitute any form of financial statement and must not be relied upon in making any judgement about the Group. The Pillar 3 disclosures have been prepared purely for explaining the basis on which the Group has prepared and disclosed certain capital requirements and information about the management of certain risks and for no other purpose.

2.4 Basis and frequency of disclosure

Pillar 3 disclosure will be made at least annually and more frequently if management determines that significant events justify such disclosure. The disclosure will generally be made following the publication of the Group Report and Accounts.

2.5 Media and location of publication

The Group's Pillar 3 will be published on the Group's website (www.krbs.com).

2.6 Management and Board sign-off

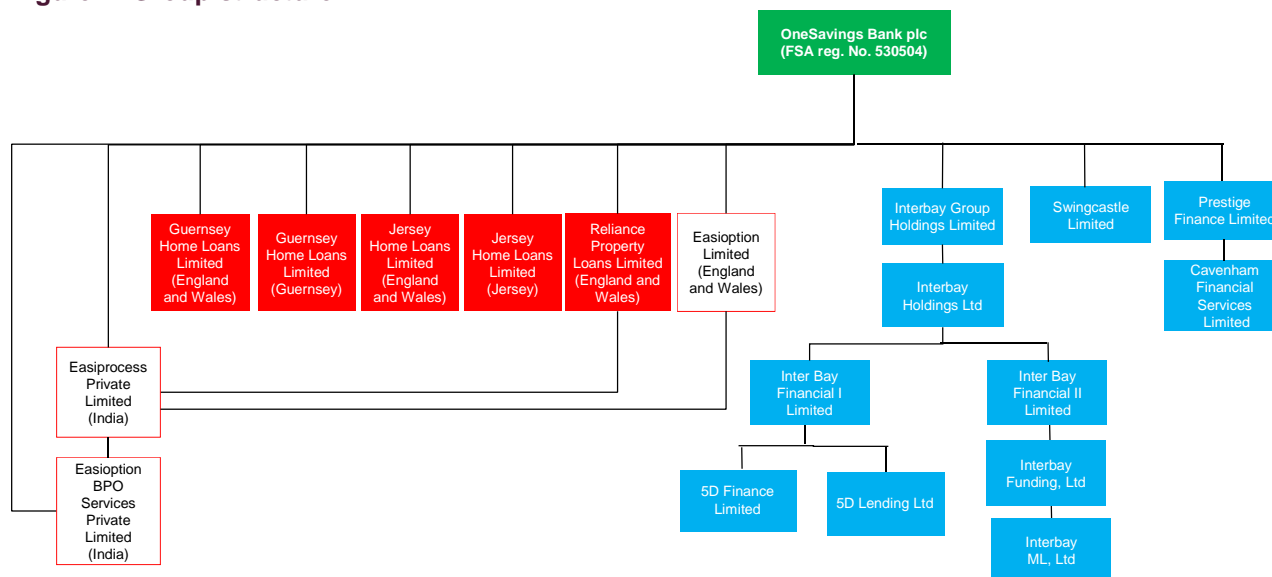

The Executive Committee and the Risk Committee are responsible for assessing and confirming the appropriateness of the Pillar 3 disclosures, including their verification and frequency. The disclosures must convey the Group's risk profile comprehensively to market participants. If that is deemed not to be the case then information in addition to that required by BIPRU 11 must be disclosed.

The Pillar 3 disclosures are formally approved by the Board-level Risk Committee for which it has delegated authority from the Board.

3 Scope

The Group operates a number of lending subsidiaries for functional or fiscal reasons rather than to effect risk transfer. Figure 1 sets out the Group’s group structure.

Figure 1: Group structure

The Group accounts include the results of the Group and its subsidiary undertakings. Subsidiaries are fully consolidated from the date on which control is transferred to the Group and are de-consolidated from the date that control ceases. Upon consolidation inter-company transactions, balances and unrealised gains on transactions are eliminated.

In the Group accounts, investments in subsidiary undertakings are stated at cost less provision for any impairment. Inter-company transactions, balances and unrealised gains on transactions between Group companies are eliminated in the Group accounts. Unrealised losses are also eliminated, unless the transaction provides evidence of impairment of the asset transferred. Accounting policies of subsidiaries have been changed where necessary to ensure consistency with the policies adopted by the Group.

All subsidiaries are 100 per cent funded by the Group and solo consolidated with the Group, with the exception of Prestige Finance and Swingcastle Limited, to which the Group has a minimal exposure. Consequently, there is no material difference in the basis of consolidation for accounting and prudential purposes.

4 Risk management objectives and policies

4.1 Risk management framework

A core objective for the Group is the effective management of risk in order to protect depositors, borrowers, and shareholders, and to ensure that the Group at all times has adequate capital and liquidity resources. Given the nature of the activities undertaken, the key risks that the Group faces are credit risk, market risk (including interest rate risk), liquidity risk, and operational risk. The Group has a Chief Risk Officer who is responsible for ensuring each risk is adequately identified, monitored, managed, and/or mitigated.

The Board is responsible for ensuring that an effective risk management framework is in place. The risk management framework consists of five key components:

- A. **Strategy and Risk Appetite:** The Board's articulation of strategic intent and risk appetite, complimented by targets and risk limits set by the executive management.
- B. **Organisation:** Clear roles, responsibilities, reporting lines, committees, and mandates.
- C. **Policies and Procedures:** A comprehensive set of risk policies, processes, and control procedures.
- D. **Reporting and Analytics:** Comprehensive and timely management reporting of risk exposures.
- E. **IT, Systems, and Data:** Robust IT systems and data quality.

The Group operates a "three lines of defence" model:

1. The **first line of defence** comes through the operational management in the business, which maintains appropriate systems and controls that are effectively implemented on a day-to-day basis.
2. The **second line of defence** comprises Risk and Compliance as well as the governance and oversight carried out by committees shown in Figure 2.
3. The **third line of defence** is independent assurance checking and challenge. This is provided by Internal Audit and the external audit assurance reviews. Assurance reporting is provided to the Audit Committee.

The Group's committee structure ensures proper governance and oversight and is illustrated in Figure 2.

Figure 2: Risk oversight and committee structure

4.1.1 The Board of Directors

4.1.1.1 Role

The ultimate control of the Group rests with the Board. Under the articles of association of the Group, the Directors direct its business and may exercise powers that are not reserved to its members in general meetings.

The Group's purpose is outlined in the articles of association. The Board will set the Group's aims and objectives, and it is the Board's responsibility to ensure that the necessary financial and human resources are in place to enable the Group to meet those objectives. The Board is also responsible for reviewing management performance.

The Board specifies the Group's risk appetite statement and delegates authority to subcommittees to act in specific areas.

It is the responsibility of the Board to ensure that there are appropriate governance arrangements, including:

- A clear organisational structure
- Well defined, transparent, and consistent lines of responsibility
- Effective processes to identify, manage, monitor, and report risks to which the Group may be exposed
- Internal control mechanisms
- Arrangements to ensure compliance with legal and regulatory requirements

- Effective control and safeguard arrangements for all information processing systems

4.1.1.2 Board subcommittees

The Board has delegated specific areas of oversight and control to the subcommittees set out below. Each committee has Board-approved terms of reference, which are reviewed at least annually. The Board subcommittees and their objectives are listed in Table 1.

Table 1: Board subcommittees

Subcommittee	Objectives
Audit Committee	<ul style="list-style-type: none"> • Assist the Board in overseeing the system of internal control and external financial reporting across the Group • Ensure the external and internal audit arrangements are appropriate and effective • Ensure the compliance arrangements are appropriate and effective • Ensure that fraud prevention and whistleblowing arrangements are established • Ensure that the annual report and accounts, related internal control disclosures, and any other publicly available financial information are reviewed and scrutinised
Nominations Committee	<ul style="list-style-type: none"> • Lead the process for Board appointments • Ensure the Board and its Committees, and the boards of the subsidiaries, have an appropriate balance of skills, experience, availability, independence, and knowledge of the Group to enable them to discharge their respective responsibilities effectively
Remuneration Committee	<ul style="list-style-type: none"> • Advise the Board on developing policy on executive remuneration • Fix the remuneration packages of individual directors and member of the Executive Team
Risk Committee	<ul style="list-style-type: none"> • Oversight of the Group's risk appetite, risk monitoring, and capital management • Provide oversight and advice to the Board on current risk exposures and future risk strategy • Assist the Board to foster a culture within the Group that emphasises and demonstrates the benefits of a risk-based approach to internal control and management of the Group

4.1.2 The Executive

4.1.2.1 Role

The Board sets out its directive controls in policy and through delegation of powers, authority, and responsibility to the CEO. The CEO chairs the Executive Committee, made up of the following:

- CEO
- Finance Director

- Chief Risk Officer
- Operations Director
- Chief Operating Officer (Inorganic)
- Sales and Marketing Director
- Chief Legal and Compliance Officer

The CEO apportions and allocates powers and duties to management through the executive team. Policies set out mandates and limits for the discharge of responsibility, and job descriptions formalise the roles of individual staff. All staff are made aware of their duties, the limits of their authority, the reporting lines and the processes over which they have jurisdiction. All management and staff in the core business are considered the first line of defence. They are responsible for implementing the controls and mitigating actions that minimise or eliminate risks to the business.

Management has embedded the internal controls required within procedure manuals and carries out supervision, exception monitoring, and staff training to ensure the effectiveness of these controls.

The Group has a Whistleblowing Standard to encourage employees and others who have serious concerns about any aspect of its affairs or those of the wider group to come forward and voice those concerns without the fear of subsequent victimisation, discrimination, or disadvantage.

4.1.2.2 Executive subcommittees

The Executive Committee has delegated specific responsibilities to a number of sub-committees which report directly into it, as listed in Table 2. The Chairman has executive responsibility for developing the inorganic agenda.

Table 2: Executive sub-committees

Committee	Main objectives and responsibilities
Assets and Liabilities Committee (ALCO)	<ul style="list-style-type: none"> • Reports to Executive Committee and monitored by Risk Committee • Ensure the Treasury is operating effectively and in accordance with the Board's Interest rate and basis risk policy • Assess the exposure of the Group to movements in interest rates and establish a strategy for managing and containing such risks • Review the limit report and highlight any departure or threat of departure from agreed limits • Monitor the net interest margin
Pricing Committee	<ul style="list-style-type: none"> • Subcommittee of ALCO • Consider and approve pricing and criteria of savings and lending products within terms set by ALCO • Make recommendations to ALCO on pricing and criteria changes that fall outside terms set by ALCO • Ensure consideration of economic, competitive, operational, and regulatory factors in pricing and criteria decisions
Credit Committee	<ul style="list-style-type: none"> • Reports to Executive Committee and monitored by Risk Committee • Review, assess, and recommend to Risk Committee proposed changes to Lending Policy, Arrears and Possession Policy, and Forbearance Policy • Approval of certain lending decisions as required by Lending Policy • Monitoring adherence to Lending Policy, including approval of subsidiary lending policies, as long as they are within overall Group Lending Policy • Review of credit risk exposure in lending portfolio, including arrears • Review, assess, and approve recovery strategies • Review, assess, and recommend to Audit Committee any changes to Loan Loss Provisioning Policy • Oversight of calculation of specific and collective provisions • Identifying and recommending improvements to systems and controls for the management of credit risk • Monitor TCF considerations in lending activity • Review staff loans annually
Transactional Credit Committee	<ul style="list-style-type: none"> • Subcommittee of the Credit Committee • Consider and approve lending decisions that fall outside the mandates of underwriters but within the mandates for the Committee • Consider and approve bespoke pricing • Review and recommend certain adjustments to Lending Policy
Operations Committee	<ul style="list-style-type: none"> • Oversee operational management of business • Provide operational inputs into larger projects • Structure and manage smaller operational projects • Oversee Indian Operations
Change Control Committee	<ul style="list-style-type: none"> • Subcommittee of Operations Committee • Oversee implementation of changes to business processing

Committee	Main objectives and responsibilities
Operational Risk Committee	<ul style="list-style-type: none"> • Subcommittee of Operations Committee • Oversee measurement and management of operational risk
Executive M&A Committee (EMAC)¹	<ul style="list-style-type: none"> • Coordinate internal OSB stakeholders for inorganic agenda • Ensure that due diligence covers all relevant aspects • After completion, oversee delivery of the integration plan

4.1.3 Risk and Compliance

Risk and Compliance are independent of the first line of defence (i.e. the business) by virtue of their reporting lines. These include a direct line to the Board and a direct line to the Executive Committee. Their role is to review, approve, and test the risks and control systems designed by management.

Risk and Compliance work with the executives to ensure general risks and regulatory risks respectively are identified, assessed, prioritised, owned, recorded, reported, and mitigated by the business. They provide independent challenge to help identify gaps in the risk and control system. These are reported to the Executive Committee and the Board and recorded on the tracking systems with timescales for action, nominated owners, and regular reports on progress to the Board Risk and Audit Committees.

Risk and Compliance also provide regular MI on the risks being run by the business, including credit risk, asset liability risk, and operational risk. This MI is provided to the appropriate executive committees, the Risk Committee, and the Board. Risk and Compliance also use the insights gained in the collection and reporting of this information to advise the business on its management of risks.

The Chief Risk Officer and the Chief Legal and Compliance Officer also provide assurance to the Board through regular reports which assess strategic risks as well as business risks.

The Chief Risk Officer's role is to ensure that all key business risks are recorded in the risk register with allocated business owners responsible for taking remedial action to mitigate shortcomings. The Chief Risk Officer facilitates action and provides regular reporting to the Executive Committee and the Board. Assurance is provided that risks are controlled through the Risk Committee.

The Chief Risk Officer chairs the EMAC and is responsible for reviewing all M&A from a risk perspective. In order to ensure independence, his variable compensation is not linked to M&A activity but rather by the Balanced Business Scorecard.

The Chief Legal and Compliance Officer's role is to ensure that PRA, FCA and regulatory requirements are met and all relevant legislation is complied with. A compliance risk assessment is carried out annually and informs the prioritisation of compliance activities, resourcing and plans for the year, including compliance monitoring, review and assessment activity.

¹ The EMAC is a recent addition to the Group's governance.

4.1.3.1 Internal Audit

Internal Audit has been outsourced to Ernst & Young, who hence act as the Group's "third line of defence" and report directly to the Chairman of the Audit Committee. In principle, all significant failings are captured by the first and second lines of defence. However a further line of defence is needed to identify any failure of systems and controls, either because they are poorly designed or they are not operating as they are intended.

Internal Audit carries out its own risk analysis of the Group's business and will review the risk assessments carried out by Risk and Compliance but may not place reliance on them. Internal Audit will review the work carried out by Risk and Compliance and report any weaknesses or areas for concern to the Audit Committee.

An inspection plan is drawn up, based on priorities arising from the risk analysis. This is then considered and approved by the Audit Committee. The results of the audits carried out are reported to the Board, together with the Executive Committee's proposed responses to mitigate findings. Any systemic weaknesses or major control weaknesses are highlighted, and the reports are graded with an opinion on the controls implications and severity of the findings.

The Board and the Executive Committee ensure that agreed actions are allocated to responsible individuals who are accountable for achieving the action within the timescales set and agreed.

4.1.4 Recovery and Resolution Plan (RRP)

RRP is a regulatory requirement, which has two distinct elements:

- the recovery plan is the Group's menu of options for addressing a range of financial stresses caused by idiosyncratic problems, market wide stresses, or both; and
- resolution planning is the provision of information and analysis to the authorities, in order to help them prepare a resolution plan for the Group.

The Group's RRP has been reviewed and approved by the Board.

4.2 Risk categorisation

The Group uses the following risk categories to define and group significant risks under common headings:

- Credit risk
- Market risk (including interest rate and basis risk)
- Liquidity and funding risk
- Operational risk
- Conduct risk
- Other risks (including but not limited to regulatory risk, taxation risk, securitisation risk)

The Group maintains a risk appetite for each of the key risks and performance against the risk appetite statements is monitored and reported on a monthly basis to the Risk Committee and the Board.

4.2.1 Credit risk

The Group's exposure to retail and commercial credit risk is managed by the Credit Committee which reports to the Executive Committee and the Risk Committee. The Group's exposure to wholesale and counterparty credit risk is managed by the Asset and Liability Committee (ALCO) which reports to the Risk Committee and to the Board.

4.2.1.1 Retail and commercial credit risk

The Group operates quantitative credit risk appetite limits for each of its major lending segments in order to ensure that the credit portfolio is sufficiently diversified. For clarity the Group's major lending segments are:

- Owner occupied residential mortgage lending
 - UK
 - Jersey and Guernsey
- UK shared ownership
- Buy-to-let
 - UK
 - Jersey and Guernsey
- Second charge lending (UK only)
- Commercial lending (UK, Jersey and Guernsey)

Retail and commercial credit risk is managed within the Group's underwriting process, which seeks to ensure that borrowers only take on a debt they can afford to repay, safeguarding both the borrower and the Group. On occasions, borrowers find themselves in financial difficulties which impact their ability to meet their mortgage or loan service obligations. The Group has established procedures to manage such situations to a satisfactory conclusion, which adhere to the principles of Treating Customers Fairly. Usually this involves working with the borrower to clear arrears or making other arrangements commensurate with the borrower's circumstances. In rare cases where the situation deteriorates significantly and irreparably, the Group takes possession of the underlying security.

In situations where the Group determines that it is appropriate in order to meet customer needs, it applies a policy of forbearance and may grant a concession. The Group considers forbearance on a case by case basis. This may arise where the Group considers that the financial stress of the customer is temporary and potentially recoverable. Such a concession, which will only be implemented after obtaining the customer's consent, may involve capitalisation of arrears, temporary or permanent conversion to an interest only repayment basis, a reduced monthly payment, or a mortgage term extension. By dealing

with arrears at an early stage and monitoring continuously, it is anticipated that a lower level of long term arrears will be achieved, resulting in a more favourable outcome for both the customer and the business.

4.2.1.2 Wholesale and counterparty credit risk

Wholesale and counterparty credit risk arise from the risk that counterparties will be unable to repay loans and other financial instruments that the Group holds as part of its liquidity portfolio or for hedging purposes. This risk is managed by restrictions on the type of assets held, assessment of the creditworthiness of counterparties, maintenance of exposure limits with each counterparty, sector limits and collateral posting for derivatives. The Group has no direct and limited indirect exposure to the countries most affected by the Eurozone crisis (i.e. Portugal, Ireland, Italy, Greece and Spain) and limited exposure to emerging markets and non-investment grade debt, including investments with other building societies.

The Group's exposure to wholesale and counterparty credit risk is managed by the ALCO, which reports to the Risk Committee and to the Board.

4.2.2 Market risk (including interest rate risk)

Market risk is the risk that the value of assets and liabilities, earnings and/or capital may change as a result of changes in market prices of financial instruments. The majority of the Group's market risk arises from changes in interest rates. The Group recognises that the effective management of market risk is essential to the maintenance of stable earnings and preservation of customer value.

Interest rate risk is most prevalent in mortgage lending where fixed rate mortgages are not funded by fixed rate deposits of the same duration, or where the fixed rate risk is not hedged by a fully matching interest rate derivative.

The Group is exposed to movements in interest rates reflecting the mismatch between the dates on which interest receivable on assets and interest payable on liabilities are next reset to market rates or, if earlier, the dates on which the instruments mature.

The interest rate characteristics of the Group's assets and liabilities including Treasury assets, wholesale liabilities, all mortgage loans, retail savings and capital instruments are modelled in the Banks risk systems. Prepayment characteristics of all fixed rate mortgages are assessed and prepayment assumptions are included in the risk modelling for hedging.

Treasury monitors the Groups interest rate risk and hedges exposures accordingly through the use of derivative contracts to ensure the Bank remains within the Board approved interest rate risk appetite limits. This process is reviewed by ALCO on a monthly basis.

Interest rate sensitivity is measured by applying a 2% parallel movement to the yield curve in both directions un-floored. At December 2012 month end the interest rate gap sensitivity to this test was +/-£557,000.

The Group does not seek to take a significant interest rate position. Un-hedged gap and basis risk positions are accepted within limits to allow management flexibility as assets and liabilities come off and on the balance sheet and to allow for management of differences

between economic, accounting, and regulatory views of exposure, but the target is broadly neutral.

The secondary market risk faced by the Group is basis risk. Basis risk arises when the Group finances an asset with a liability which re-prices from a different interest rate index. The Group manages this exposure on an on-going basis within limits set by the Board and monitored by ALCO monthly. The Board approved risk appetite limits for interest rate and basis risk are reviewed annually through the ICAAP process.

The Group holds Treasury assets that are classified as 'available for sale' which are valued monthly and the fair value is recognised in the separate available for sale reserve account in accordance with the accounting standards.

4.2.3 Liquidity and funding risk

Liquidity and funding risk is the risk that the Group's resources will prove inadequate to meet its liabilities as they contractually fall due or as a result of any contingent or discretionary cash outflows that may occur in a stress. It arises from the mismatch of timings of cash flows generated from the Group's assets and liabilities (including derivatives). Liquidity risk arising from the structure of the balance sheet (structural liquidity) is managed in line with policies approved by ALCO. The Group's liquidity management policies are reviewed and approved annually by the Board Risk Committee (on behalf of the Board).

The Group's policy is to ensure that sufficient funds are available at all times to meet demands from depositors, to fund agreed advances, to meet other commitments as and when they fall due, and to ensure the Board risk appetite is met. This is achieved through maintaining a prudent level of liquid assets, through wholesale funding facilities, and through control of the growth of the business.

The Board's risk appetite for liquidity risk is defined in terms of:

- survival periods which measures the degree of sufficiency of liquid assets to support the Bank's activity over time under a number of stress scenarios;
- adherence to strategic liquidity risk measures; and
- compliance with all regulatory liquidity risk limits.

The Group monitors its liquidity position on a daily basis. The liquidity position is reported monthly to ALCO and the Board. It also monitors the adequacy of its controls to provide assurance that liquidity risk is being appropriately managed, and regularly assesses its funding position. This is supported with detailed contingency funding plans and recovery options, which are tested and reviewed on a regular basis. The Group's liquidity management framework is designed in line with PRA BIPRU regulations and industry guidelines.

Liquidity management is governed by the Treasury Policy, which is developed, implemented and monitored by the ALCO, which also sets limits over the level and maturity profile of wholesale funding and monitors the composition of the Group balance sheet. A series of liquidity stress tests are performed daily to confirm that the limits are not at risk of being

breached. Day-to-day management is delegated to the Treasury function with oversight of the Risk function.

4.2.4 Operational risk

Operational risk, which is inherent in all business activities, is the risk of direct or indirect loss resulting from inadequate or failed internal processes, people, or systems or from external events. It can occur in any of the Group's businesses and includes errors, omissions, natural disasters, and deliberate acts such as fraud. The Group manages this risk within an overall governance and control strategy. Within this structure, potential risk exposures are assessed to determine the appropriate type of controls to be applied. It is recognised that such risks can never be entirely eliminated and that the cost of controls in minimising these risks may outweigh the potential benefits. However, where required, the Group continues to invest in risk management and mitigation such as business continuity management and incident management. Each business area or function has appointed an operational risk champion who is responsible for the day-to-day identification and reporting of operational risk incidents. The Operational Risk Committee is responsible for the development, implementation, and monitoring of the Operational Risk Policy.

The Group's business strategy is reflective of a moderate appetite for operational risk. The Group seeks to proactively mitigate any conduct risk.

4.3 Conduct risk

Conduct risk, which is the risk that the Group's behaviours, offerings or interactions will result in unfair outcomes for customers, is considered throughout the established systems and controls including on-going oversight and monitoring from the existing executive sub-committees. Significant conduct risks are reported to the Board Risk Committee and the Board.

4.3.1 Other risks

4.3.1.1 Regulatory risk

Regulatory risk is the risk of regulatory changes and enforcement, with the potential for fines and/or restrictions in business activities. Over recent years, the financial services industry has seen increased regulatory scrutiny and supervision around governance, capital, liquidity and remuneration. There has also been focus on conduct and treating customers fairly.

4.3.1.2 Taxation risk

Taxation risk is the risk associated with changes in taxation law or in the interpretation of taxation law. It also includes the risk of changes in taxation rates and the risk of failure to comply with procedures required by taxation authorities. Failure to manage taxation risks could lead to an additional taxation charge.

4.3.1.3 Securitisation risk

Securitisation risk is the exposure to risks transferred through securitisation of assets should those transfers fail for any reason. The Bank holds highly rated UK RMBS in its investment portfolio but has not securitised any assets. The RMBS portfolio is all 'AA' or 'AAA' rated by Fitch and the total value of the portfolio was £21.9mil at 2012 year end.

5 Capital Resources

The following table sets out the Group's capital resources.

Table 3: Capital resources

	31/12/2012	31/12/2011
	£'000	£'000
Tier 1 Capital		
Permanent share capital	1,001	361
Transfer reserve	(12,818)	(12,818)
Retained losses	(3,921)	(12,562)
Share premium account / Capital contribution	106,421	90,639
Deductions from tier 1 capital	(910)	(495)
Total tier 1 capital after deductions	89,773	65,125
Tier 2 Capital		
Perpetual subordinated bonds	37,189	37,327
Available for sale reserve	1,285	1,822
Collective provisions	1,284	1,260
Subordinated liabilities	26,873	26,842
Bonds	703	-
Deductions from tier 2 capital	(4,145)	(797)
Total tier 2 capital after deductions	63,189	66,454
Excess of Tier 2 over Tier 1	-	(1,329)
Total regulatory capital	152,962	130,250

The Group acquired the Interbay Group in August 2012 and Prestige Finance and Swingcastle in September 2012. Both acquisitions were capital accretive for the Group.

Interbay, a commercial SME mortgage lender, was acquired on 29 August 2012. The Group obtained a solo consolidation waiver for the Interbay Group which allows capital resources to be assessed at the consolidated level. The acquisition provided additional core tier 1 capital of £5.6m in the form of negative goodwill of £4.4m (which was immediately recognised in profit and loss at the consolidated level) and equity capital of £1.3m through the issue of B preference shares in Interbay Group Holdings Limited ('Bidco') as part of the acquisition consideration. The value of the B shares has been enhanced over and above their nominal value by a bilateral put/call agreement between the seller and JC Flowers.

Prestige Finance and its sister company Swingcastle, both second charge mortgage lenders, were acquired by the Group on 14 September 2012. The acquisition provided additional

Core Tier 1 capital of £15m and Tier 2 capital of £704k. The Group did not apply for a solo consolidation waiver for these entities, so the additional capital is all at the OSB legal entity level and mainly comprises dividend income of £14.4m received from Prestige and Swingcastle post completion. It is worth noting that at a consolidated level this additional capital appears as a combination of negative goodwill of £13.2m and equity capital of £2.2m through the issue of E ordinary shares in OSB as part of the acquisition consideration. The value of the E shares has been enhanced over and above their nominal value at a consolidated level by a bilateral put/call agreement between the sellers and JC Flowers. The additional Tier 2 capital comprises loan notes issued by OSB to repay shareholder loans and a deferred profit sharing arrangement at completion.

In the past, JC Flowers has provided capital injections into OSB. If necessary, other parties can be approached for further capital. The expectation is that capital will be generated organically as the Group returns to profitability.

The Group's Recovery and Resolution Plan discusses options for raising capital in a stress, some of which (e.g. reduction in new business origination) are considered as management actions in the analysis of the capital planning buffer in the Group's ICAAP while others (e.g. sale of portions of the business) are reserved for more severe situations that are outside the scope of the ICAAP.

Intangible assets include capitalised software. All the Perpetual Subordinated Bonds (PSBs), Subordinated Liabilities and Bonds are issued by OSB. The terms of PSBs, Subordinated Liabilities and Bonds are detailed below:

	£'000
Linked to LIBOR (London Interbank Offered Rate):	
Floating rate Subordinated Liabilities 2015	3,002
Floating rate Subordinated Liabilities 2016	3,003
Floating rate Subordinated Liabilities 2017	5,656
Floating rate Subordinated Loans 2022	703
Linked to the average standard mortgage rate of the five largest building societies:	
Floating rate Subordinated Liabilities 2017	5,049
Fixed rate:	
6.45% Subordinated Liabilities 2024	10,163
7.875% Perpetual Subordinated Bonds	15,189
6.591% Perpetual Subordinated Bonds	22,000
Total	64,765

Subordinated liabilities and bonds which are in their final five years to maturity are being amortised on a straight line basis.

6 Capital requirements

6.1 Pillar 1 requirements

The Pillar 1 capital requirement is calculated using the following approaches:

- Credit – Standardised Approach (BIPRU 3)²
- Operational risk – Basic Indicator Approach (BIPRU6)
- Market risk – not applicable (BIPRU 7)

The following table shows the RWAs in accordance with the standardised approach to credit risk and separately 8% hereof reflecting the minimum Pillar 1 capital requirement for each of the standardised credit risk exposure classes. The table also shows the Group's operational risk capital requirement calculated in accordance with the basic indicator approach and its capital requirements due to counterparty credit risk.

² As the Group is using the Standardised Approach for credit risk, BIPRU 4 (The IRB Approach) is not applicable.

6.2 Large Exposures

The Group tracks its exposures to connected counterparties (referred to as connections) and regularly reports on its largest exposures, those exceeding £4m,³ to the Credit Committee, Risk Committee, and Board. Risk Committee approval is required for any lending above a Board defined threshold with full Board approval required for any exposure above an even higher threshold.

Connections within the large exposure list are subject to detailed review, with the emphasis on non-performing assets where the Group's actions will have most impact. Large performing connections are monitored closely to help anticipate any problems occurring.

6.3 Overall Pillar 2 Rule

Additional capital is held under Pillar 2 for risks either not captured or not fully captured under Pillar 1.

³ This report includes many connections that are not defined as large exposures under BIPRU 10.5.1R, which is exposures greater than 10 per cent of capital resources, or c. £15m for the Group. Exposures below £4m are reported at the discretion of the Risk team.

At least annually the Group will undertake a detailed, forward-looking assessment of capital adequacy in order to assess the Pillar 2 capital requirement. This exercise is known as the Internal Capital Adequacy Assessment Process (ICAAP). Based on the results of the ICAAP the PRA determines the Group's required Individual Capital Guidance (ICG) and Capital Planning Buffer (CPB). It is the Group's policy to hold capital resources in excess of the higher of what is implied by the Group's ICAAP and the sum of the ICG and CPB.

On a monthly basis the capital forecasts are refreshed and reviewed by the ALCO, the Risk Committee and the Board. The refreshed projections will reflect the impact of actual performance to that time and will consider whether key assumptions are still valid. Capital forecasts will also be produced in circumstances where a potential impact to capital may occur such as revised budget forecasts or in the course of evaluating a substantial acquisition.

Capital is not formally allocated to the businesses with lending targets and limits based instead on gross volume. However, return on equity is a key metric in product design and lending decisions and management can adjust targets and limits depending on capital availability.

6.4 Counterparty risk

Group wholesale counterparty risk through Treasury dealing is concentrated in two main areas. Deposits with institutions and to a lower extent mark to market exposures with derivative counterparties.

Cash deposit exposures are controlled through board approved limits to highly rated Banks and selected Building Societies. Counterparty ratings are monitored by Treasury and reviewed monthly by ALCO.

Counterparty risk is mitigated with derivative counterparties that have CSA collateral agreements in place. Regular derivative valuations allow the Bank to assess exposures and call for margin when it exceeds threshold tolerances.

6.5 Credit risk

This section provides detailed information regarding the Group's exposure to credit risk.

6.5.1 Definition of past due and impaired

For regulatory purposes, a financial asset is considered as past due when the contractual payment is due for more than three months. For accounting purposes, a financial asset is treated as past due and then impaired when there is objective evidence that impairment exists either individually for financial assets that are individually significant, and individually or collectively for financial assets that are not individually significant. Provisions under regulatory rules are calculated on the same basis as impairment provisions, and so all provisions for impaired loans and advances are referred to as impairment provisions.

6.5.2 Approaches and methods for value adjustments and provisions

The Group regularly assesses whether there is evidence that a financial asset or a portfolio of financial assets that is not carried at fair value through profit or loss is impaired. A financial

asset or portfolio of financial assets is impaired and impairment losses are incurred if, and only if, there is objective evidence of impairment as a result of one or more loss events that occurred after the initial recognition of the asset and prior to the balance sheet date ('a loss event'), and that loss event or events has / or have had an impact on the estimated future cash flows of the financial asset or the portfolio that can be reliably estimated.

The Group first assesses whether objective evidence of impairment exists individually for financial assets that are individually significant, and individually or collectively for financial assets that are not individually significant. If the Group determines that no objective evidence of impairment exists for an individually-assessed financial asset, whether significant or not, it includes the asset in a group of financial assets with similar credit risk characteristics and collectively assesses them for impairment. Assets that are individually assessed for impairment and for which an impairment loss is or continues to be recognised are not included in a collective assessment of impairment. An individual provision is also made where an account is not in arrears but the Group has exercised forbearance in the conduct of the account. Any provision is based on a management assessment of the propensity for the account to realise a loss had forbearance not been shown taking account of the amount recoverable on mortgage indemnity cover and additional security.

For loans, receivables and held-to-maturity investments, the amount of impairment loss is measured as the difference between the asset's carrying amount and the present value of the estimated future cash flows discounted at the asset's original effective interest rate (EIR).

The calculation of the present value of the estimated future cash flows of a collateralised financial asset reflects the cash flows that may result from foreclosure and any costs for obtaining and selling the collateral, whether or not foreclosure is probable.

For the purposes of a collective evaluation of impairment, financial assets are grouped on the basis of similar risk characteristics, taking into account asset type, industry, geographical location, collateral type, past-due status and other relevant factors. These characteristics are relevant to the estimation of future cash flows for groups of such assets by being indicative of the counterparty's ability to pay all amounts due according to the contractual terms of the assets being evaluated.

Future cash flows in a group of financial assets that are collectively evaluated for impairment are estimated on the basis of the contractual cash flows of the assets in the Group and historical loss experience for assets with credit risk characteristics similar to those in the Group. Historical loss experience is adjusted on the basis of current observable data to reflect the effects of current conditions that did not affect the period on which the historical loss experience is based and to remove the effects of conditions in the historical period that do not currently exist. In addition, the Group uses its experienced judgement to estimate the amount of an impairment loss. This incorporates amounts calculated to overcome model deficiencies and systemic risks where appropriate and supported by historic loss experience data.

The following tables analyse impaired loans as treated for accounting purposes and past due loans as treated for regulatory purposes at 31 December 2012.

Table 5: Impaired, past due, provisions and provision charges by counterparty type

Counterparty type	Gross impaired loans £m	Gross past due loans £m	Impairment provisions £m	Charges for impairment provisions during the year £m
Corporates	39,307	9,763	26,525	-
Retail	26,778	51,052	4,447	6,622

6.5.4 Use of External Credit Assessment Institutions (ECAIs)

The Bank subscribes to Fitch Ratings (Fitch), a PRA recognised ECAI. Ratings assessments provided by Fitch are used by the Bank to establish counterparty credit risk weightings using the PRA standardised approach.

The tables below map the ECAI's credit assessment ratings to credit quality steps in order to establish the appropriate risk weightings for the rated credit exposures.

Table 12: Exposures by Credit Quality StepInstitutions (incl. banks)¹

Credit Quality Step	Fitch's assessments	Moody's assessments	S&P's assessments	Risk Weight	Exposure £m
1	AAA to AA-	AAA to AA-	Aaa to Aa3	20%	15,665

Total					298,421

6.6 Operational Risk

The Group calculates its operational risk capital requirement using the Basic Indicator Approach but is developing its framework in accordance with the standards relevant to firms adopting the Standardised Approach (as described in BIPRU 6).

In addition, the Group maintains levels of operational risk capital consistent with any Pillar 2 adjustment that might be identified through the ICAAP process.

6.7 Remuneration (BIPRU 11.5.18)

In accordance with the principles of SYSC 19A, a firm must establish, implement and maintain remuneration policies, procedures and practices that are consistent with and promote sound and effective risk management. Policies and procedures must be comprehensive and proportionate to the nature, scale and complexity of the firm's activities.

A firm must maintain a record of its remuneration Code Staff (including senior management, risk takers, control functions and staff whose activities may have a material impact on the firm's risk profile) and take reasonable steps to ensure they understand the implication of the code.

The Group has a Remuneration Committee which ensures that the Group operates a remuneration process and implements a remuneration policy which is consistent with the principles of SYSC 19A and the Remuneration Code. The Remuneration Committee consists of T. Hanford (Chair), P. Williams and D. Mills.

The Committee recognises the need to be competitive within the UK financial services market, however the Committee's policy is to ensure that the executive directors, senior management and employees are fairly and responsibly rewarded in return for high levels of individual and business performance.

The policy focuses on ensuring sound and effective risk management through:

- A stringent governance structure for setting goals and communicating these to employees;
- Performance assessment metrics for executive and other Code Staff are reviewed and agreed by the Chief Risk Officer and include both financial and non-financial goals; and
- Making all variable remuneration awards at the discretion of the Committee and subject to individual, business unit, overall Group performance and stated risk appetite.

The Chief Legal and Compliance Officer and Head of compliance also have significant input into remuneration policy to provide an independent review.

6.8 Remuneration of Code Staff

Code Staff remuneration comprises a number of elements: basic salary, performance incentive pay and benefits:

Basic Salary

Basic salary is determined by levels of responsibility, external market competitiveness and individual performance in the role. The Group's policy is to position salaries so that on average, they are in line with salary packages for comparable positions in similarly performing financial institutions, taking account of the level of other benefits provided;

Performance incentive pay

The executive directors, Chairman (in his role as the Bank's lead on merger and acquisition activity) and other executives (all of whom are Code Staff) participate in a non-pensionable medium term incentive plan under which cash bonuses are awarded at the discretion of the Board, when determined appropriate, according to success in the delivery of corporate and individual objectives, elements of which include risk, compliance and control metrics. A proportion of the cash bonuses are deferred over a three year period, and are subject to claw back in the event that financial targets are not met or if there is a material financial downturn or failure of risk management before the end of the deferral period.

In addition, a long-term incentive plan ('LTIP') has been approved by the B shareholder and OSB Board and has been offered to the executive directors, other executives and Chairman for implementation in 2013. The aim of the LTIP is to provide an appropriate balance between short, medium and long-term objectives in the overall remuneration package. No bonuses were paid to other code Staff in 2012.

Benefits

All of the executive management team receive car allowances and are members of a contributory defined contribution pension scheme. Some executives also received relocation allowances when taking up their appointments.

The Remuneration Committee is provided with executive remuneration and benefits data from comparative organisations across the financial services industry and banking sector and procures such other relevant data from independent expert sources as appropriate, although no specific external advice was received by the Remuneration Committee in 2012.

Table 13: Aggregate information in respect of code staff

	Code Staff Aggregate Remuneration
Fixed Remuneration: <ul style="list-style-type: none">• Salaries £1,473,650• Pension £118,242• Other Benefits £71,470	£1,663,362
Variable Remuneration: Cash Bonus <ul style="list-style-type: none">• Paid £107,340• Deferred £196,383	£303,723 (includes paid and deferred bonuses)
Number of Code Staff:	12 code staff

Figures are for remuneration in respect of the 2012 Financial Year and include bonuses actually paid in 2013 but earned in respect of the 2012 Financial Year.
